SKYFALL CONSTRUCTION 010 595 8931

ABOVE: Skyfall Construction offers clients the ultimate home-building experience. Skyfall's expertise ranges from design to engineering, project management, construction and construction management, interior design, interior decorating and landscape design. Working closely with the home owners and with a team of professionals who are experts in their respective environments, including the architects, this construction company built not only a stunning house but also a comfortable family home. The perfect, clean lines of the home bring in an element of elegance and refinement.

“Views are spectacular, especially from the Jacuzzi, which takes pride of place on the balcony.”

Having a young family, these home owners were looking for a safe and secure environment in which to live in a healthy way and nurture their children. “We have access to a multitude of lifestyle activities in a safe and secure environment. We want to raise our children the same way we were brought up – cycling in the street, playing outside and leaving the front door open for the neighbours to pop in,” says the home owner.

“We also wanted to create a home that had to incorporate the outdoors, a home which displayed a warm ambience, and a home that when people come to visit, they don't want to leave.”

The owners specifically chose a north-facing stand with no neighbours in front of them so that they could enjoy the garden leading out onto a green belt of rugby and soccer fields – ideal for their young sons. >

SYAM DISTRIBUTORS 0861 SYAM SA (7926 72)

LEFT: Syam Distributors was called in to add an elegant touch to the contemporary space within the formal lounge. The Syam Designer Gas Fire Grate is the perfect addition as the 304 stainless steel grate is well suited to the modern feel of the room, while offering a warm cosy spot to relax.

90 APRIL 2018

“Wood can be found throughout the home.”

GOTSMANN ARCHITECTS 011 979 7116

ABOVE: Gottsmann Architects designed this stunning 520m² family home. Creating a sense of connected space, the open-plan allows interior and exterior entertainment and living spaces to flow into one another. A strong relationship to the landscape is further established by framing these spaces with striking views of the surrounding green belt. Gottsmann Architects finds a balance between public entertainment space and private family space while expressing a reverence for the surrounding natural beauty throughout this design.

“The immaculate views often leave us speechless as we cannot believe we are actually living in Johannesburg.”

“Downlighting brings in a comfortable, peaceful and romantic ambience.”

PATIO WAREHOUSE 087 825 1120

ABOVE: Patio Warehouse provides the largest selection of patio furniture and accessories throughout Africa. The company provided the elegant Petunia Lounge setting for this patio. It's an all-weather wicker setting with aluminium frames, which is both durable and maintenance-free. The setting also comes in different modular parts so that you can build your own lounge set to fit your home's needs. Included in this set are the taupe colour cushions, which are practical. Colourful scatter cushions were added to enhance the overall look of the patio.

Views are spectacular, especially from the Jacuzzi, which takes pride of place on the balcony. “The Jacuzzi encompasses a 180° view of the area with the golf course and Sandton lights on the opposite side. The immaculate views often leave us speechless as we cannot believe we are actually living in Johannesburg,” says the home owner.

Another favourite is the main bedroom. Not only is the room spacious, but it also includes a dressing room with more than enough cupboard space. Downlighting brings in a comfortable, peaceful and romantic ambience. There is a unique feature to the main bedroom in that the bedroom and en-suite bathroom are divided by a wall with a 360° flip-around TV, so when lying in bed or in the bath the owners can catch up on their favourite series.

The home has an open and fresh atmosphere with large glass windows and doors that open up the home to the garden. Glass has also been used for the balustrades leading upstairs. Wood can be found throughout the home – the floors, some table surfaces, as well as the dining room and breakfast nook tables and the staircase. >

“The bedroom and en-suite bathroom are divided by a wall with a 360° flip-around TV.”

Keeping with the warm and spacious atmosphere, the formal lounge is decorated in neutral colours with clean lines and a Syam Designer Gas Fire Grate to add a touch of elegance and a modern feel.

Enjoying the warm summers is a dream in an entertainment area that brings in all the natural elements such as the modular all-weather wicker furniture and a braai strategically placed within a wall of stone cladding. A swimming pool surrounded by a huge deck and a fire pit finishes this area off.

The kitchen is open-plan, which allows for family and friends to engage with each other from different rooms. It is also equipped with modern appliances while remaining unobtrusive and elegant. 🏡
